too

Java implementation:

Mahmudul Hasan
IT-21019

```
import javax.crypto.cipher;  
import javax.crypto.KeyGenerator;  
import javax.crypto.SecretKey;  
import javax.crypto.spec.SecretKeySpec;  
import java.util.Base64;  
  
public class ECBmode Example {  
    public static SecretKey generateAESKey()  
        throws Exception {  
        KeyGenerator keyGen = KeyGenerator.getInstance("AES");  
        keyGen.init(128);  
        return keyGen.generateKey();  
    }  
}
```

```
public static String encrypt(String plaintext,  
    SecretKey secretKey) throws Exception {
```

IT-21019

```
Cipher c = cipher.getInstance  
("AES/ECB/PKCSpadding");
```

```
cipher.init(cipher.ENCRYPT_MODE,  
SecretKey);
```

```
catch (Exception e) {  
    e.printStackTrace();  
}
```

output :

Original Text: Hello cyber world!

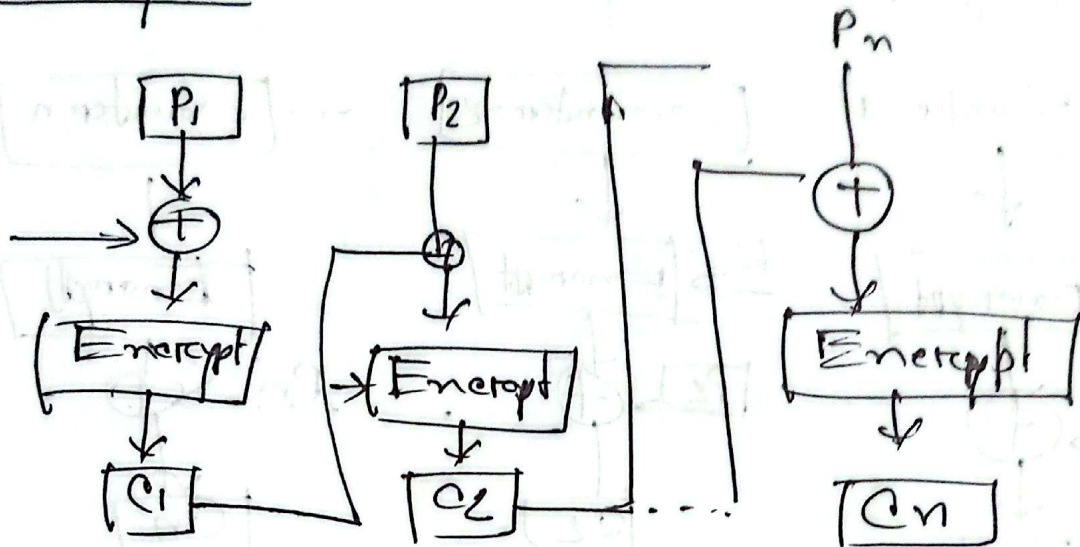

Encrypted text: ~~Secret~~ xBP3A...

Decrypted text: Hello cyber world!
